

Project Plan 2a  
Holly Switzer

Print "How many integers would you like to enter?"

Get response from user

Print "Please enter (insert response from user) integers."

Run for loop to enter the number of integers specified by user

    Get response from user

        If integer is larger than max,  
            Set integer as new max

        Else, integer is smaller than minimum  
            Set integer as new min

    Increment the number of input guesses by one

Print "min: (input new min value)"

Print "max: (input new max value)"

Testing

User input	Program output	Reason
Input 1 then 1	Min:1 and max:1	Only one integer input
Input 2 then 1 2	Min:1 and max:2	Two integer input
Input 5 then 9 3 7 1 2	Min:1 and max:9	5 integers and then separated
Input 0	-	0 integers input
Input 2 and 2 2	Min:2 and max:2	Same integer
Input 3 and -1 0 2	Min -1 and max:2	3 integers
